See Front Page of Cover for these Dahlias Displayed.

QUICK VICTORY—This Dahlia is a perfectly bred, golden rose-pink. One of the finest blooms. Good for cutting. 25c.

SPRINGFIELD—A new Dahlia of our own introduction. It is a deep red with a salmon-pink in the center. It is Lonsdale except in two essentials. It has a darker stem and the flowers, instead of being a salmon-pink as in Lonsdale, are a true red. Its beauty will soon be appreciated. No Dahlia blooms freer, no Dahlia is as pretty as Springfield. It lasts longer cut than any Dahlia we know. 25c.

GARDEN SET OF EIGHT GLADIOLI COSTING 92c., SENT FOR 75c.

*BERTREX, the Beautiful—Lustrous white with pencil stripes of lilac in throat. Strida right at the top of all existing white varieties. Flowers of great substance and of the size and form of perfection. Forms a pyramid, attracts up water well and a good shipper. Our customers give their unqualified endorsement. Each 10c.

*GLORY—This is the first ruffled Gladiolus that Kunderd produced. The opening buds are of a soft creamy-white edged with pink, but as the flowers expand the ground color changes to rich ivory-white suffused with pale lavender, which is deeper on the edges. The lower petals are buffish, with a pale crimson stripe through the center; the throat is penciled with buff. The spike is straight and strong. Flowers large and of graceful form; four to six out at one time. This is the variety that made Kunderd famous. Each 10c.

*LIMACULEE—Undoubtedly the best commercial white Gladiolus in existence. Very tall spike will set with large flowers of great substance. Each 10c.

LOVELINESS—As its name implies this variety produces flowers of distinction in daintiness and beauty. The color is of pale creamy tone, soft and delicate. A superb white. 10c.

*FRANK PENDLETON—The new sensational beauty, winner of awards and prizes everywhere. The petals show beautiful bright rose-pink on a pure white ground, contrasting in an orchid. Showy. The upper petals are rich velvety blood-red blotch on the lower petals. As showy as an orchid. The most perfect and delicate coloration ever produced when the spikes are cut and carried indoors as soon as the first blossoms open. No grander variety in existence. Each 10c.

*MRS. WATT—Glowing American Beauty shade of wine-red; soft color; well opened flower, nearly all flowers hold at one time; spike very erect and not too stiff. Very distinct variety. Created a lot of comment at recent exhibitions. Each 15c.

*PINK PERFECTION—A true apple-blossom pink with immense flowers. The buds are so many and crowded so close together on the stalk that when the blooms is one mass of light delicate pink. The softness of coloring and the magnificent texture of blooms make it one of the choicest of the new varieties. Each 15c.

Like so many others I was greatly disappointed when I received Rose bushes ordered from you, but my disappointment were very soon supplanted by joy when I found the results derived from same.

In sending you this order I feel I ought to thank you for the order of Roses which I received from you in the fall of 1917. They were all in first-class condition when I received them, and what more to me that they were all true to name. I have bought Roses from other houses before, but there have always been quite a few in their order not true to name.

My plants came yesterday and they are splendid. The "Bargain Set" of six Roses, in the two-year size, is truly a bargain. I paid another nursery seventy-five cents and a dollar for no better plants, and the other plants are just as good. I had worlds of blooms last summer from my one-year size Roses, and they are big plants now, with well-established roots and ready for this year's blooms.

Dear Miss Baines,

My face has grown wrinkled and my hair has turned white since I first saw your ad. of that sweetest little girl stumbling along but holding fast to her flowers. In my age am also holding fast to flowers.

I am so thankful for my Rose garden which, by the way, is in our back yard, that I want you to know that it is a source of joy to ourselves and friends, and so many sad eyes have beheld them as their own and found comfort, and the children have admired and promptly received them in their chubby hands, and all the while they grow and bloom and smile upon us. I thank God first and then you.

MRS. DON Y.

Dear Madam.

We had wonderful success with your Roses in southern Utah, especially the American Beauties. My Roses have turned out to be beautiful and naturally people want to know where I bought them, and that is why I cannot keep a catalogue.

MRS. ALMA C. L.

Received your four little roses and they are growing nicely, also the four Mums. Other Roses of yours of last year are doing splendid and the Killarney and Bessie Brown I got from you a few years ago are the most beautiful things in this country. Your little Roses have splendid roots and I have not had one to die.

THE CREAM OF THE NEW ROSES

We here offer what is good in the new Tea and Hybrid Tea Roses. To have what is good you must try these Roses. They are the best that England, France, Ireland, Italy, Holland and America can produce.

Price 25c. each, except where noted. Two-year plants, 60c., except where noted.

COLUMBIA (H. T.)—This is a new American Rose, grown by the veteran rosarian E. G. Hill. It is a very vigorous grower of a true pink shade, deepening as it opens to glowing pink. A peculiarity of this variety is that the shades all become more intense until the full maturity of the flower is reached, and this color is enduring.

COUNTRESS CLANWILLIAM (H. T.)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

CRIMSON CHATENAY (H. T.)—This is the Crimson Chatenay, a great Rose. All know the Mime, Abel Chatenay. Well, this is a clone from that with all the other good qualities of its parent.

CRIMSON QUEEN (H. T.)—A very strong, upright grower, flower large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom.

CRUSADER—(New.) A big, strong growing variety, robust and rugged in every characteristic. The growth is heavy and the flower stem strong and heavy. It is free flowering and the blooms are big and double and in color a rich velvety crimson. A free flowering red Rose that is a wonder. 50 cents.

FLORENCE FORRESTER (H. T.)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white; the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flows is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Very sweetly perfumed. Gold medal, National Rose Society.

FRANCIS SCOTT KEY (H. T.)—It is very fitting that such a fine new Rose should be honored with the name of the author of the "Star Spangled Banner," and also that it should hail from Baltimore, one of whose forts was being assailed when the inspiration came to the author to write our national anthem. The flowers are from large to very large, with sixty or more petals opening to a high center. The color is a magnificent deep red Rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.

FRANK W. DUNLOP—(New.) Did you see it at the International Flower Show at New York the past spring? Its record at the exhibition, winning all the medals for the best new pil Rose, gold sweepstakes medal for the best seedling in the show. Frank W. Dunlop was the finest flower in the exhibition. Claimed to be better than Mrs. Charles Russell. 50 cents.

GLOIRE DES BELGES (H. T.)—Growth vigorous and free, flowerings continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

GOLDEN SPRAY (H. T.)—Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep Marechal Niel yellow, opening to almost single blooms of clear lemon-yellow. Awarded gold medal, National Rose Society of England.

HADLEY (H. T.)—In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-year-round forcing variety.

HOOSIER BEAUTY (H. T.)—We use description of E. G. Hill Co.: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliancy. As soon as thoroughly established in the soil sends out long, stiff growths with a bud on every shoot."

Frank W. Dunlop.
THE CREAM OF THE NEW ROSES—Continued

KILLARNEY BRILLIANT (H. T.)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

LADY PLYMOUTH (T.)—The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe. Awarded gold medal National Rose Society of England, and silver medal at Crystal Palace Show, London.

LADY ROBERTS (T.)—The color is a rich golden-yellow, very free bloomer and a grand garden Rose.

LOS ANGELES (H. T.)—Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever increasing wealth of color is maintained from the incipient bud until the last petal drops. 50c each; 2-year plants, $1.00.

LILLIAN MOORE (H. T.)—No Rose ever has been offered to the public with the same credentials, having been in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar Trophy offered at the "Panama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles O. Moore. Color deep pure Indian-yellow, deeper center; long buds; free bloomer.

MADAME COLLETTE MARTINET (H. T.)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

MADAME BUTTERFLY—(New) Is Hill's glorified sport of Ophelia. Seen and admired by thousands. All the color tones of Ophelia are intensified, making it a harmony of bright pink, apricot and gold. Ophelia ranks at the top in popularity and Madame Butterfly will surpass it. It averages more petals to the bloom; it produces more bloom to the plant because it makes more branches, everyone carrying a bud. The tight buds are a lovely shade of Indian oak, yellow at the base; they are unique for corsages and for low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color and of delicious fragrance. 50 cents.

MADAME MARCEL DELANNEY (H. T.)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold Medal of the Hagatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

MISS WILMOT (H. T.)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S. 35c each.

Francis Scott Key. (See description on page 3.)
THE CREAM OF THE NEW ROSES—Continued

MRS. CHARLES BELL (Piermon, 1915)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink. Radiance, and is a sport of that well-known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell. Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. CHARLES RUSSELL (H. T.)—This wonderful new American Rose has taken the country by storm. No other forcing Rose except "American Beauty" can be made with it when it comes to counting points. Stems three feet long, stiff and surrounded by grand rosy-pink blooms of the largest size and build. 35 cents. each.

MRS. CAMPBELL HALL (Tea)—Dedicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise coral-fawn. Very deliciously fragrant. Awarded gold medal, N. R. S.

MRS. HENRY WINNETT (H. T.)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail grower. The finish of all the red or crimson varieties. The buds are long and well formed. A superb red Rose. 50c. each.

MRS. JOHN COOK—White, suffused with delicate pink describes the color of this strong-growing, big-flowered daughter of Ophelia. The color varies with the season, the flush of pink being more pronounced during cool weather, while the Rose is almost white during the long days of bright sunshine. In bud it is nicely formed, the mature flower opening cup-shaped but expanding fully to a large and finely-formed bloom. It is bigger and better in summer than White Killarney and, with its delicate pink in dark weather, is a very charming color. 50c.

MRS. MACKELLAR (H. T.)—The glorious blooms make this an imposing Rose. A deep citron, or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly red and become the pearly primrose, white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

MURELLE (T.)—A Rose of the type of Safrano, only a much stronger grower. It is a very free bloomer and is a Rose with a great future. Color rosy-blush flushed with saffron-yellow.

NATIONAL EMBLEM (H. T.)—Dark crimson, of perfect shape, habit and inflorescence: as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely and continuously.

OPHELIA—Salmon-flesh shaded with rose, large, and of perfect shape; of excellent habit; the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety. Growth vigorous. Certainly a glorious Rose. Be sure to have "Ophelia" fixed in your memory.

PILGRIM—(New.)—In color, a beautiful shade of bright rose-pink. The bud, which opens perfectly, is long and of ideal form. Pilgrim is a Rose of good substance and petalage, and at any stage of development is perfect in color and form of flower. Its pronounced tea fragrance will attract all Rose lovers. It is prolific and highly productive of first quality blooms. The stems are straight and strong. It is the pink Rose to grow. 50 cents. two-year plants, $1.00.

PREMIER—This is the long-looked for deep Rose for the garden; a beauty, and one you will be pleased with. It is a very free bloomer, almost smothering the plant. The color is bright and attractive. The growth is all that is to be desired, and altogether a wonderful Rose. 50 cents; two-year plants, $1.00.

RED RADIANCE (H. T.)—All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere, a fine grower and free bloomer, and no prettier plant. Grow grown. Red Radiance is its exact counterpart except that the color is a rich deep red.

New Rose, Premier.

Miss Wilmot (See description on page 4).
THE CREAM OF THE NEW ROSES—Concluded

ROSE MARIE (H. T.)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

TIPPERARY (H. T.)—In color stands between Lady Hillingdon and Melody, showing an attractive shade of soft golden-yellow in the bud and half developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

W. C. GAUNT (H. T.)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety vermilion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

The "Excelsior" List of Ever-Blooming Roses

NEW AND CHOICE FOR OUTDOOR PLANTING, OR HOUSE CULTURE

Price, 20 cents each; any six for $1.00. If you leave the selection of the varieties to us we will send seven for $1.00. Large two-year-old Roses from this list, 40 cents each, or three for $1.10.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardly everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effect East and everywhere in America they are planting it by the thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds, and combined in beautiful effect with several other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in the winter should be a money-maker, both outdoors and under glass. The buds and flower are both handsome. Color, blush, shaded light salmon-pink; distinct and desirable.

MRS. WIL. B. CUTRUSH—Flowers the delicate pink of Dorothy Perkins.
PERLE D'OR—Coppery-orange, changing to fawn.
NEW POLYANTHA, OR BABY ROSES

PRICE, 25 CENTS EACH; TWO-YEAR PLANTS, 60 CENTS.

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with them.

BABY ECHO—The best Polyantha produced. Color rosy-flesh color. Of splendid strong growth and freedom of bloom, which are of wonderful keeping qualities either natural or after being cut. Improved Baby Taussendschoen. It has more substance and more color, and is the best of all Baby Roses for pot culture. Be sure and try this one.

BABY TAUSSENDSCHOEN, or THOUSAND BEAUTIES—Its flowers are large, so much like Thousand Beauties, that it has been rechristened Baby Taussend-Schoen, the bush form of the Thousand Beauties, having all the charm of the variable coloring in its flowers that its parent has, but a firm, white, delicately flushed pink, changing to deep rosy-carmine. A splendid Rose. Try it.

EDITH CAVEIL—Bright crimson; white eye; very beautiful.

ETOILE LUISANTE, or BABY HERriot—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), color up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which, on account of the the similarity in color, has been known among the cut flower trade as Baby Herriot. Its color is a shade of pink with intense coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is a free grower and most beautiful. We are certain that Baby Herriot will please everyone.

GEORGE ELGER—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blend; like all of its class, it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

GREETING OF AACHEN—Yellowish-rose colored with salmon-pink and red shading; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

Mlle. FRANCISQUE FAVRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowers being in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

ORLEANES—The showiest and prettiest of all the Baby Rambler Roses. The charming and dainty Baby Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any other Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and is making a sensation in this country. Awarded gold medal.

“Famous" Rose Collection for Garden Planting—Concluded

MAMAN COCHET (The Queen of all Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well-nigh marvellous, and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery rose. As we read it, our good Rose list of the Cochret Roses is worth a whole collection of poor ones.

SOUVENIR DE PRES. CARNOT—Grand Rose of the largest size; color delicate fawn or salmon; fine.

WHITE MAMAN COCHET (No Place Rose Than This)—This Rose attracted our attention from the very first time we ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, or rounded and very double. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in the immense size of its bud and flowers—indeed, nothing in the Tea family approaches it in size. Delicately fragrant.

W. K. SMITH—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

The New Hardy Climbing Roses

HARDY EVERYWHERE

New Rose, Climbing American Beauty, in, and measures about 3 inches across. In every way, this Rose is worthy of the highest recommendation as it occupies a prominent position in the Rose world. 35 cents each.

PAUL'S CARMINE PILAR—The earliest of the Climbing Roses to come into flower. Color a rich rosy-carmine with white eye. 25 cents; two-year plants, 60 cents.

RED DOROTHY PERKINS, OR EXCELSA—The defects of Climbing Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuriana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large clusters of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maron, the tips of the petals tinged with scarlet. The finest of all red Climbing Roses 25 cents; two-year plants, 60 cents.
The New Hardy Climbing Roses—Concluded

SHOWER OF GOLD—This variety produces masses of flowers in large clusters. The color is a deep golden-yellow, with orange shadings in the center. Enormous lateral branches are produced, which are densely clad with glossy green foliage that resists disease. This fills the “long felt want” for a hardy yellow Climbing Rose. 25 cents; two-year plants, 50 cents.

SILVER MOON—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. These flowers are borne on strong stems twelve to eighteen inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. 25 cents; two-year plants, 60 cents.

TAUSENDSCHOEN, or THOUSAND BEAUTIES—A Climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring. This Rose is so captivating that it need not be further described. 25 cents; two-year plants, 60 cents.

New Fern Liberty

This is our own production. In the past we have sent out Baby’s Breath, Teddy Junior and Roosevelt, the three greatest Ferns today, acknowledged so by all plantmen and flower lovers, and now we add another one to the galaxy, “Liberty,” no doubt the best of them. All the fronds have finely divided pinnae that give them a very beautiful appearance, while the whole plant is overlaid with a bluish cast that makes it a very striking object. Wonderfully beautiful, different from all other Ferns. First time offered. Fine young plants, 50c each; strong plants, $1.00 each. Be sure and try this beautiful Fern.

The “Parlor Fern”

Nephrolepis Whitmanii Compacta

This is a condensed form of the “Ostrich Plume” Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. Fine young plants, 35 cents; strong plants, 75 cents.

BEAUTIFUL HOUSE FERNS

The “Fluffy-Ruffles Fern”

Nephrolepis Superbissima

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and its irregular shaped fronds, which give it the name of “Fluffy Ruffles Fern.” The fronds are very heavily imbricated, the pinnae overlapping, and so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. Fine young plants, 75 cents.

New Liberty Fern.
THE "TEDDY JUNIOR FERN"

Nephrolepis Teddy Junior

"Teddy Junior," the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. **Fine young plants, 35 cents; strong plants, 75 cents.**

THE "ROOSEVELT FERN"

*Nephrolepis ROOSEVELT*

It is our good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons; it produces many more fronds than the Boston, thus making it a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the "Roosevelt" a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. **Fine young plants, 35 cents each; strong plants, 75 cents.**

The "Big Four Fern"

*Nephrolepis Splendida*

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time.

It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of a "Fish Tail."

Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail."

Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns.

It well deserves the name of "Big Four Fern."

Everyone who sees it goes "daffy" about it. This is without question the most splendid of all the Nephrolepis. Be sure and try it.

**Fine young plants, 35 cents each; strong plants, 75 cents.**

THE "NEWPORT FERN"

*Nephrolepis Scotti*

Of much dwarfer and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Fine young plants, 30 cents each; strong plants, 75 cents.**
The "Ostrich Plume Fern"
Nephrolepis Whitmanii

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation." In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. Fine young plants, 35 cents; strong plants, 85 cents.

**Ostrich Plume Fern.**

**THE "WANNAMAKER FERN"**
Nephrolepis John Wannamaker.

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Scholzelli, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. Fine young plants 30 cents; strong plants, 75 cents.

**THE "BOSTON FERN"**
Nephrolepis Bostoniensis

In the vicinity of Boston, no other plant is so extensively used as this graceful Nephrolepis, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable. Fine young plants, 35c; strong plants, 75c.
BEAUTIFUL HOUSE FERNS—Concluded

The "Philadelphia Lace Fern"

_Nephrolepis

_Elegantissima

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. **Fine young plants, 33c; strong plants, 75 cents.**

The "Old Original Sword Fern"

_Nephrolepis Exaltata

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the Nephrolepis we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. **Fine young plants, 25c; strong plants, 75c.**

The "Baby's Breath Fern"

_Nephrolepis Goodii

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well grown specimens in any size. Our reputation for it that no Fern in existence can compare with "Baby's Breath" in fluffiness. **Fine young plants, 50 cents; strong plants, $1.00.**

The "Crested Fern"

_Nephrolepis Scholzii

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or

SPLENDID PEONIES

Hardy Everywhere.

“ARISTOCRAT OF FLOWERS”

The wonderful improvements made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of our fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit our field will say, “I have Pink and White Peonies, I desire only Red ones,” but when they are shown the Pink and White, they invariably exclaim, “How grand! I have none like them.” There is as much difference in Peonies as there is in Roses.

SPECIAL COLLECTION OF PEONIES

To those who do not care for the nomenclature of the Peony, we have made up several collections, and here offer them as an aid to making selections. Patrons will find these varieties embrace a wide range of color and form, and are exceptionally meritorious.

BARGAIN COLLECTION

CARNATIONS THE DIVINE FLOWER PINKS

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the “Divine Flower.” Plants in the open ground or in pots quickly make large specimens, and when brought indoors in the fall produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive; don’t buy them—grow them yourself. Pinch the plant back frequently during the summer season. In the fall bring indoors, place in a four or five-inch pot, keep in a temperature of forty to fifty degrees at night, and they will yield an immense number of flowers with splendid stems as fine as those sold by florists. If not pinched in they will bloom profusely during the summer. We offer the finest varieties in existence. Your order is incomplete without some Carnations.

Excelsior Collection of Choice Carnations

20 cents each; set of Three Excelsior Carnations, postpaid, for 50 cents, the entire Eight for $1.25.

HERALD—One of the grandest of all Carnations for the garden, a dazzling red color that nothing surpasses.

MATCHLESS—Largest flowers of the purest immaculate white; large sized blooms. Valuable for garden planting and for pot culture. Very sweetly scented with that delightful old-fashioned clove fragrance.

ROSETTE—No other Carnation we know of equals this fine dark rose colored variety; very fragrant.

SENSATION—Certainly a grand pink Carnation of the largest size and deliciously scented.
This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the large clumps of them in our old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects.

The Ever-Blooming Butterfly Bush

(Buddleya Variabilis Magnifica)

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was one of them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it, because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the more usually colored butterflies that swarm about it as though vying with it in brilliancy of color. This shrub from a young plant, set out either in the spring or fall, will grow to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in large panicles of beautifully colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until several frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce an increase the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. Fine plants, 35 cents; three for 85 cents.

Buxus

Ornamental Box—Sempervirens
Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the Sempervirens Nana, but we find it so much more vigorous and hardy that we advise planting this and trimming to height required. 20 cents each; six for $1.00.

Calycanthus Floridus

(Carolina Allspice or Sweet Scented Shrub)—A most desirable shrub. The wood is fragrant; flowers of a rare chocolate color, having a pungent agreeable odor that is very penetrating. They blossom in June and at intervals afterwards. Fine plants, 20 cents; strong two-year-old plants, 50 cents.

Cydonia Japonica

(Japan Quince.) Has bright scarlet flowers in great profusion in early spring. One of the best shrubs. Fine plants, 50 cents.

Forsythia Viridissima

A fine hardy shrub, leaves and bark deep green; flowers golden-yellow. Blooms earliest of all shrubs before the foliage comes. 25 cents; two-year size, 50 cents.

Deutzias

Their fine habit, luxuriant foliage and profusion of bloom render them among the most beautiful of shrubs. They flower in the latter part of June.

HIBISCUS SYRIACUS

Althea or Rose of Sharon

Also known as the Hollyhock shrub, belongs to the Mallow family. These are the most beautiful shrubs we have in our collection. The flowers are of large size, very double and full of various brilliant and striking colors. They bloom freely during August and September, when scarcely any other shrub is in bloom. We offer nine of the very choicest varieties as follows:

ANEMO; LORI—Largest of all Althea bloom; double wine-red.
BOULE DE FEU, or Ball of Fire—Double red.
COELESTE—Single sky-blue; extremely showy.
JEANNE d’ARC—Double snow-white.
MONSTROSA—Semi-double white, red center.
PAAONIFLORUS—Double pink.
RUBUS—Single red; a striking variety.
VIOLET CLARE—Double violet; very popular.
SNOWDRIFT (Tutus Albus) — Single pure white.

Fine plants, 20 cents each, the nine colors for $1.50. In two-year plants, 40 cents each, the nine for $3.00.
Hydrangea Paniculata

Grandiflora

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. Blooms profusely from July until frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back each spring fully one-half of the past season's growth, as the flowers are much finer if the plant is treated in this manner. The flowers are much finer and larger if grown in a good, rich soil, but the plant is so hardy and so easily grown that success is almost certain in any kind of soil and in any situation.

Young plants, 25 cents. Strong flowering plants, for immediate effect, two years old, 80 cents.

New Hydrangea

"Hills of Snow"

This is the great new hardy shrub that has come to gladden our yards and gardens. We place it first and foremost of all shrubs. It makes a perfectly round, symmetrical bush that is covered from June to August with handsome large pure white flowers. Be sure and plant this new hardy shrub, it will please you greatly.

Young plants, 25 cents each; strong two-year-old plants, 60 cents.

Spirea (Meadow Sweet)
These are beautiful shrubs of the easiest culture. Their blooming extends over a period of three months. One-year, 25 cents each; strong two-year-old plants, 50 cents each.

ANTHONY WATERER—This beautiful gem makes a low, compact bush and is covered nearly the whole growing season with large umbels of deep crimson flowers which measure nearly a foot across. When scarcely three inches high it begins to bloom, and thereafter is seldom out of flower. As a pot plant or for growing in the open ground, nothing can equal it.

VAN HOUTTEI (Bridal Wreath)—Without doubt the very finest of all shrubs. With us in May and early June the plant is completely covered with a mass of large white flowers presenting a beautiful appearance. Named the "Bridal Wreath" on account of its long graceful sprays of pure white.

Rhus Cotinus (Purple Fringe or Smoke Tree)
A much admired shrub for its curious fringe or hair-like flowers that cover the entire plant, giving it the appearance of being enveloped in smoke. 50c.
